

Anthony Metzler

Engineering & Program Manager

About Me

Professional with 10+ years experience guiding design, development, quality, and support of scalable web platforms. Tenacious contributor and empathetic leader with experience leading diverse, cross-functional teams in taking projects from conception to completion. Committed to leveraging best practices and incremental improvement initiatives for creating sustainable, forward-thinking solutions.

Work Experience

Designer and Software Engineer

Freelance Contractor

August 2018 - Present

- Designed, developed, and QA'd 20+ B2B/B2C eCommerce platforms for clients across a wide range of industries.
- Focused on creating responsive interfaces, cross-browser accessibility, and integrating with internal/external APIs.
- Partnered with external product leads in strategy development, refining requirements, and project coordination.

Founder

Metz Tech Co

February 2017 - Present

- Ideated and developed a smart inventory management platform optimized for consumer users (Android, iOS, Web).
- Created an educational resource platform utilizing GatsbyJS.
- Designed the platforms' technical architecture, UI/UX, automated testing, and continuous delivery pipelines.

Lead Engineer and Program Manager

LifeAssist Technologies

July 2017 - August 2018

- Managed multiple interdependent programs ranging from a clinical study with the Canadian Ministry of Health, spearheading the UI/UX redesign of the company's core platform, and developing an API service focused on normalizing data with external technical partners.
- Lead project coordination tasks, process design sessions, and was responsible for defining, analyzing, and reporting metrics for all aspects of the projects being managed.

Work Experience Continued

Engineering Manager

ClearCare

September 2016 - February 2017

- Managed a team of 6-10 engineers; designed and oversaw development processes; coordinated with engineering and DevOps teams including external technical partners; analyzed and reported project metrics to the stakeholders.
- Lead the development, testing, and release of new React-based mobile apps and a GraphQL API service integrated with the legacy, monolithic Python application.
- Co-managed the architectural design and development of a continuous integration pipeline with automated testing, which decreased pre-deployment times by 50%.

QA Manager

ClearCare

March 2013 - August 2016

- Directly managed a team of 3-5 QA engineers responsible for automated testing, tracking and triaging bug reports, and documenting software quality standards and processes.
- Acted as the lead release manager responsible for near-daily production deployments and system issue communications.
- Directed the design and completion of an automated test framework that decreased manual testing time by 75%.
- Oversaw the launch of partner integrations, including Harvard Medical, Stanford, enterprise customers, payment processing vendors, and background check providers.

Founder

Creative Solutions

July 2009 - March 2013

- Led a team of business development managers, designers, and engineers in developing a cloud-based mobile ordering and POS platform.
- Spearheaded product development of the web platform from conception to launch.
- Acted as project manager overseeing the integration of partner APIs providing payment and SMS functionalities.
